29 September 1969

MEMORANDUM FOR THE RECORD:

SUBJECT: Topographic Map - Headquarters Area

1. The Chief, Cartography Division, OBGI, advised that they would be able to produce a useable planning map but not of the precision which Army Map Service could provide. The Cartography Division would need the **LI-2** photography rectified; that is, free of distortion and the Fairfax quadrangle blown up ~~ten~~ times, or to the scale of 1:2400 which is the same scale that NPIC is making the aerial photograph.

2. Mr. Snyder of Army Map Service was advised to proceed with the estimate on our original basis and without purchasing additional commercial photography as we did not want to obligate any funds until such time as we knew the total cost. Mr. Snyder advised that he would proceed with the estimate.

3. [REDACTED] has located ^{one} 5' contour drawings of ^{one} both the Headquarters Building and the BPR property which should enable the Cartography Division to provide us with a reasonably accurate 5' contour planning map. The Printing Services Division is currently reproducing us 6 copies of that portion of the Fairfax quadrangle that we are interested in.

4. The Cartography Division will be furnished all of the above materials by 3 October 1969.
